# *Introduction*

Kerman Automotive Industries Company (KAIC) is an integrated industrial group comprising vehicle manufacturers, component suppliers, trading, service, and financial companies.

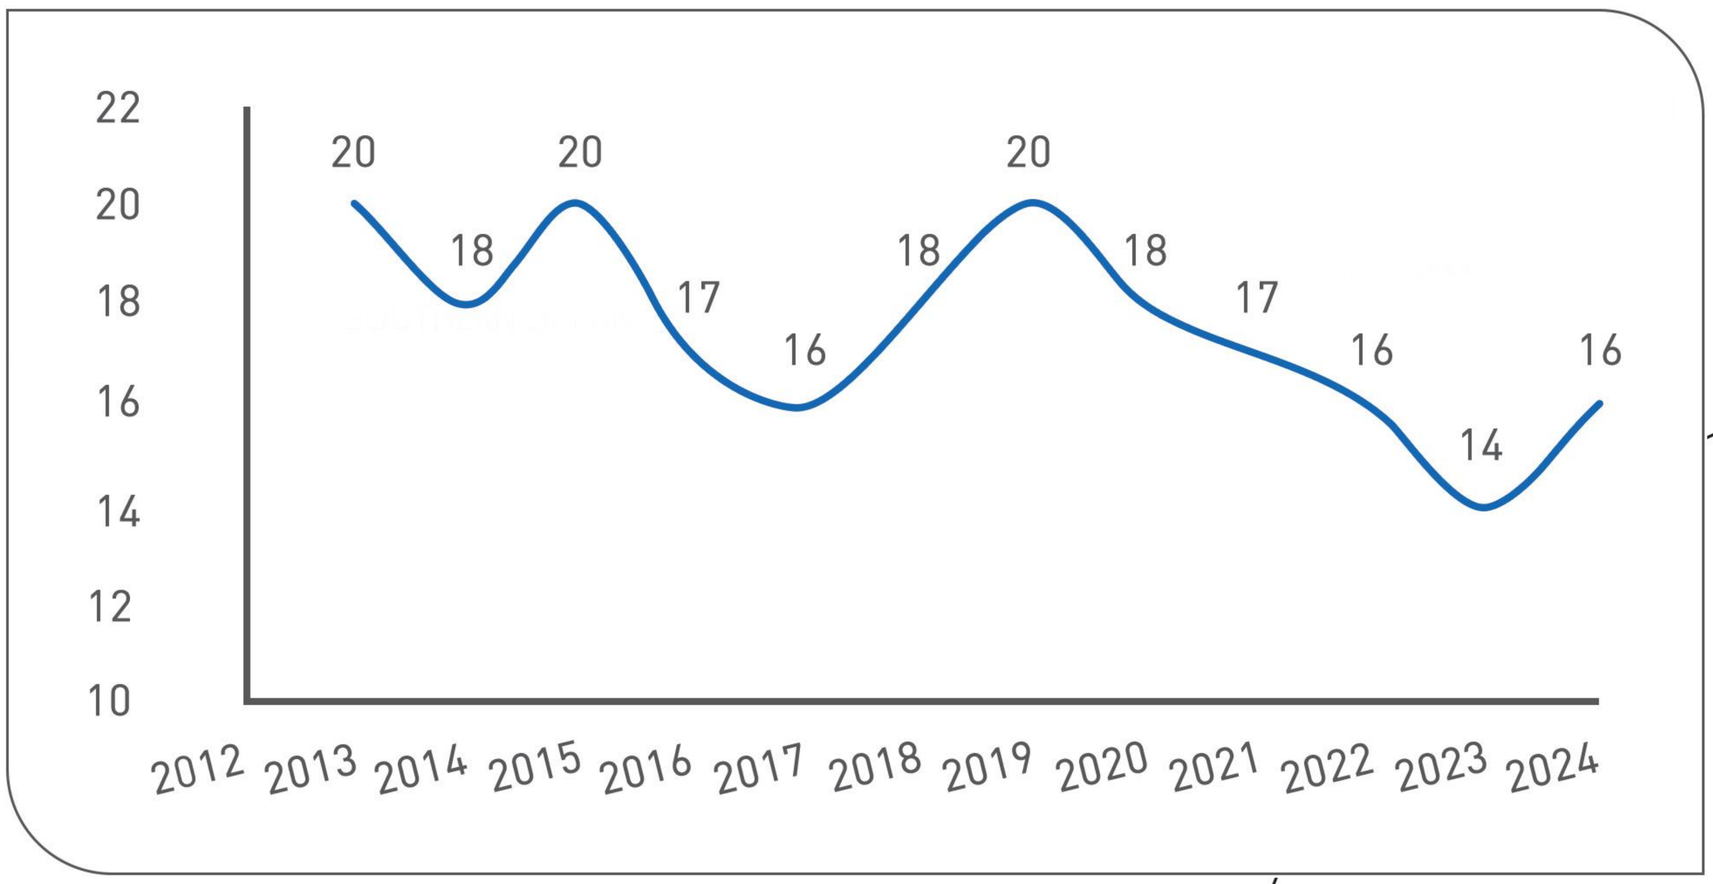

This group was established with the objective of supporting automotive production facilities located in the Arg-e-Jadid Bam Special Economic Zone.

KAIC commenced its automotive activities in 1992 through a Joint Venture (JV) for the manufacturing and assembly of its first vehicles in collaboration with Daewoo of South Korea. Subsequently, in response to evolving international conditions and market dynamics, the group expanded its portfolio through strategic partnerships with global automotive brands including Hyundai, VW, Hafei Lobo, Lifan, JAC, BYD, Geely, SWM, Skywell, and Livan, initiating the production of a diverse range of vehicles.

As a result of these developments, Kerman Khodro Industrial Group, leveraging the capabilities of its 35 subsidiary companies led by Kerman Motor and active across vehicle manufacturing, component production, aftersales services, trading, and financial services has rapidly progressed toward its strategic objectives. These include the expansion of domestic and foreign investment and the transformation of the Arg-e-Jadid Special Economic Zone into a major national automotive hub.

Through private-sector investment and the development of the Arg-e-Jadid Special Economic Zone in the underdeveloped region of Bam, a new model for sustainable security has been realized, driven by economic growth and non-governmental participation.

## Selected Development  Projects of Group Companies

Deployment and implementation of an integrated ERP system
Achievement of %50 localization for KMC X5 and JAC S3
Completion and commencement of mass production for KMC EAGLE, EAGLE EV, and PS12
Launch of cylinder machining lines and establishment of engine and transmission R&D, testing, and validation units
Commissioning of a 3.300-ton injection molding line for dashboard and bumper production, along with the required industrial infrastructure
Enhancement of technical know-how and transformation of Negin Bam into a knowledge-based company, including access to nanotechnology for phosphate and degreasing products
R&D activities on polyurethane foams for automotive seat production
Production of audio-visual systems and manufacturing of window regulators, digital clusters, and electronic accelerator pedals for group vehicles
Establishment of Kerman Cycle and launch of motorcycle, bicycle, and electric scooter production lines
Manufacturing of D23 and D26 housings
Development of a 5-MW solar power plant in Bam
Expansion of road, rail, container rail, and maritime vehicle transportation
Outsourced production of various products under the MAXX POWER brand
Design and development of digital infrastructure to deliver a fully integrated, platform-based virtual leasing service
Financing of operational execution for the Ashko Pars project
Financing of seat and exhaust production for Kerman Motor products
Optimization of production hall layouts, development of logistics infrastructure, and continuous training and upskilling of human capital

# Mission

To establish and develop automotive manufacturing, component production, and supply chain industries without reliance on government financial resources; to create employment and support regional development; to enhance social welfare and security; to pioneer competitive vehicle manufacturing through technology transfer and market diversification; to reduce industrial concentration in major cities; to promote balanced population distribution in developing regions; and ultimately, to position Arg-e-Jadid Bam as the country's leading automotive industrial hub.

## Arg-e-Bam

Arg-e Bam, the world's largest adobe structure, is located in southeastern Iran and has played a significant role in revitalizing tourism in Kerman Province. Renowned for its historical significance, distinctive cultural landscape, and agricultural products—particularly its globally recognized dates and citrus fruits—the site is registered on the UNESCO World Heritage List as "Bam and its Cultural Landscape."

## Arg-e-Jadid Bam

Located 10 kilometers from the city of Bam, Arg-e-Jadid Bam is recognized as a prime investment destination and an attractive tourist area. Covering approximately 6,450 hectares, the zone includes 1,000 hectares designated as a Special Economic Zone, with the remainder developed as a modern township offering residential, recreational, and tourism facilities.
Significant investments in automotive and related industries, alongside the development of hotels, restaurants, parks, sports complexes, cinemas, amphitheaters, cycling and equestrian tracks, banking and service centers, abundant water resources, and scenic desert landscapes, have created favorable living and working conditions for investors and professionals in the industrial and agricultural sectors.

# Kerman Automotive Industrial Group (KAIC) Background

**1990**

Establishment of Kerman Automotive Industrial Group (KAIC) to manufacture automobiles, components, and assemblies, positioning it as the industrial hub of Kerman Province in accordance with the existing development plan.

**1992**

DAEWOO

Initiated partnership with Daewoo Motors and established Kerman Motor Company under a %51-%49 ownership structure.

**1994**

Production and assembly of Daewoo vehicles concluded following Daewoo's acquisition by General Motors, and Daewoo's share was reverted to KAIC.

**1996**

KADEC

Establishment of Kadec Company to supply primary components and promote localization efforts.

**1997**

Development of the New Arg Special Economic Zone to advance the necessary infrastructure for automotive industry growth.

**1999**

Establishment of Kerman Motor Powertrain Company (KPTCO) to assemble engine components and subassemblies.

**2002**

CHERY مدیران خودرو

Investment in Modiran Vehicle Manufacturing Company, a joint venture with Chery Automobile and a domestic partner.

**2002**

Establishment of Khodro Mehr Company for localization of polymer components and assemblies.

**2003**

BAC

Establishment of Bam Automotive Company (BAMCO).

**2003**

HYUNDAI

KAIC signed a partnership agreement with Hyundai Motor Company.

**2003**

خودرو سازان راین

Establishment of Rayen Vehicle Manufacturing Company (RVMCO) to produce and assemble Hyundai Avante and Verna models; operations ceased in 2011.

**2005**

Volkswagen

BAMCO signed an agreement with Volkswagen to produce and assemble the Gol model; production was suspended in 2010 due to international sanctions.

**2005**

Bam Khodro was established to provide after-sales support for all vehicles produced by KAIC.

**2007**

LIFAN

Agreement with Lifan Motors to produce and assemble Lifan ,520 620, X50, X60, and 820 models.

**2007**

Establishment of Negin Bam Company to supply domestic paint, coatings, and other consumables.

**2008**

ارمان موتور ارگ
ARMAN MOTOR ARG

Establishment of Arman Motor Arg for assembly of interior and decorative components.

**2009**

JAC MOTORS

Agreement with JAC Motors for production and assembly of J3, J4, J5, S5, and S3 models.

**2015**

GEELY

BAMCO entered into a production agreement with Geely for the GC6 model.

**2016**

Renewal of Hyundai agreement following the lifting of national sanctions, covering all models.

**2017**

KTL

Establishment of Kerman Automotive International Trade and Support Company (KTL).

**2020**

Launch of the KMC brand as the new passenger vehicle trademark for KAIC.

**2020**

Entry into the pickup segment with the KMC T8

**2021**

Expansion into the luxury SUV – segment with the KMC K7

**2021**

گروه مپنا
نماد خودباوری

Design and development of KAIC's first electric vehicle in collaboration with MAPNA, the largest engineering .conglomerate in the country

**2022**

KMC
کرمان موتور

Kerman Motor Company Rebranding

**2022**

Commissioning of press lines and body component production, including cylinder heads, at KPTCO.

**2022**

Entry into the full-size sedan segment with the KMC J7

**2023**

Launch of KAIC's proprietary platform and first domestically developed vehicle, KMC Eagle, and export of initial production units to Iraq.

**2023**

Partnership with Shineray to produce and assemble SWM models.

**2023**

Unveiling of the KMC X5, a facelifted version of the previously successful JAC S5 SUV.

**2023**

BAMCO and Liwan Motor signed a production agreement for the X3 Pro model.

**2024**

Completion of KAIC's electric vehicle portfolio and establishment of a strategic collaboration with Tehran Taxi Organization.

**2024**

Launch of KMC T9, the company's second pickup model.

**2024**

Entry into the mid-size SUV segment with KMC A5

**2024**

Launch of KAIC's first mass-produced electric vehicle.

**2024**

Commencement of mass production for KMC Eagle.

## Hafez Research, Development, and Innovation Center

The Hafez Center was established to foster research collaboration, develop automotive standards, provide specialized consulting services, and strengthen the linkage between academic and industry. Its activities focus on identifying technological needs, localizing technologies, developing new platforms, attracting emerging technologies, establishing specialized laboratories, and supporting technology-driven companies.

# President Rafsanjani's visit - April 1997

# Subsidiaries of Kerman Khodro Industrial Group

## Kerman Motor Company (KMC)

Vehicle manufacturing and assembly with an annual capacity of 150,000 units
Business partners: Hyundai, JAC

## Bam Automotive Company (BAC)

Vehicle manufacturing and assembly with an annual capacity of 100,000 units
Business partners: Geely, Livan

## Karmania

Development and production of commercial vehicles with an annual capacity of 80,000 units

## Novin Mahan (NEBKA)

Established through investment by Kerman Automotive Industries Group and MAPNA to supply electric vehicles

# Subsidiaries of Kerman Khodro Industrial Group

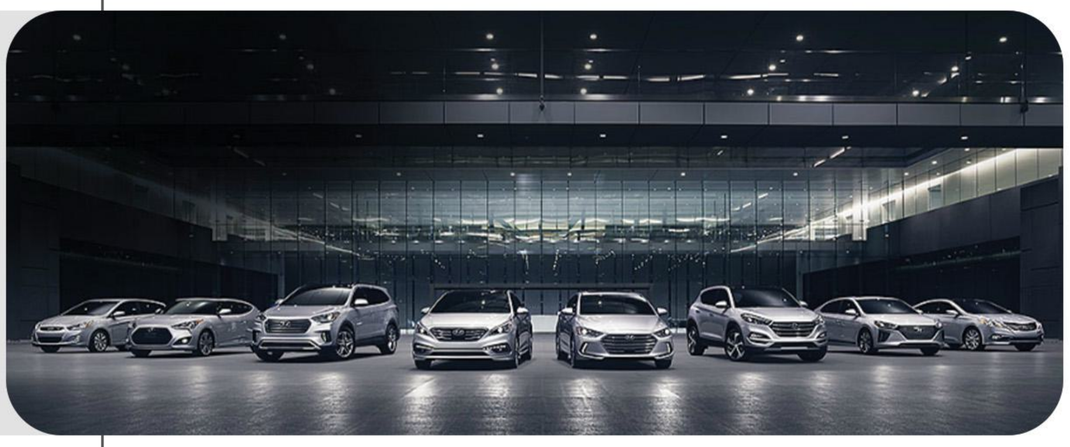

## Bam Khodro (TBK)

Aftersales service and parts network development for Lifan, JAC, Livan, and Geely vehicles through 145 dealerships

## Kerman Khodro Trading & Logistics (KTL)

Aftersales service and parts support for Hyundai vehicles through 77 dealerships

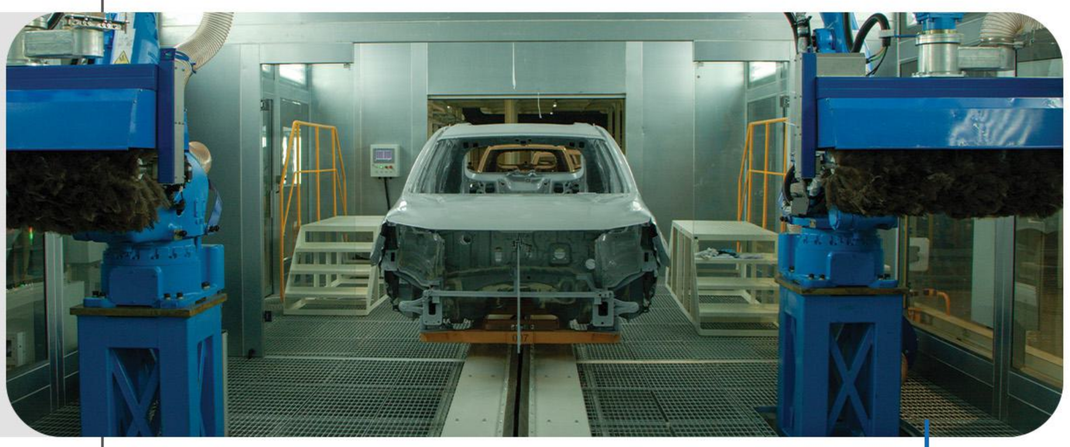

## KHODRO MEHR

Supply and assembly of polymer components and modules

## NEGIN BAM

Supply of paints, coatings, and consumables; production and assembly of engine and transmission components

# Subsidiaries of Kerman Khodro Industrial Group

## Kerman Khodro Powertrain (KPTCO)

Manufacturing and assembly of engine and transmission components

## Kerman Khodro Parts Design & Engineering (KADEC)

Parts sourcing, localization planning, and component development

## MANA

Digital-only trading platform for Kerman Khodro vehicles (SIGMA)

## KARAMAD

Financial advisory, investment, and brokerage services

## Kerman Khodro Transportation (KTT)

Logistics and freight transportation services

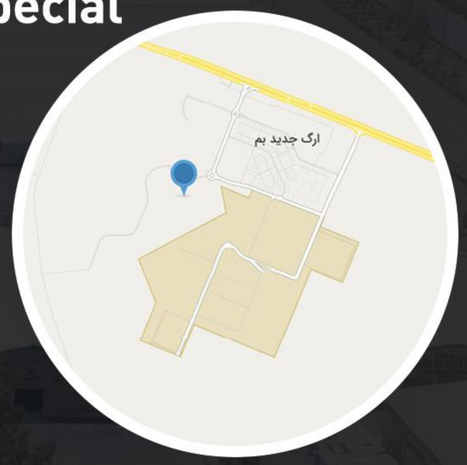

## Nakhl Arg Kariman

Manufacturing of automotive body components within the Arg-e-Jadid Special Economic Zone

**All land, facilities, and manufacturing plants of Kerman Automotive Industries Company (KAIC) are located in Kerman Province within the Arg-e-Jadid Special Economic Zone.**

## Special Economic Zone Overview

Location: Southeastern Iran, 480 km from Bandar Abbas (Iran's main port), situated on the Kerman–Pakistan transit corridor
Total Area: 6,450 hectares

## Infrastructure

Integrated airport and railway access connected to national road networks
Banking - Healthcare - Educational facilities - Utilities (energy and telecommunications) - High-level security - Residential zones
Tourism and recreational attractions
Dedicated customs administration ranked among Iran's top ten customs offices by scale.

## Automotive Manufacturing Hub

The only Special Economic Zone in Iran exclusively dedicated to the production of vehicles, automotive components, and related industries.

# Social Responsibility

Beyond supporting governmental initiatives in infrastructure, healthcare, education, sports, and public services, Kerman Khodro Industrial Group has actively invested in enhancing welfare services and improving living standards in Bam County. Through direct investment and accelerated execution of development projects, the Group has allocated its maximum financial capacity—estimated at approximately IRR 200 billion annually to the development of social and welfare infrastructure in underdeveloped areas of Bam.

# Human Capital Development & Empowerment

Workforce empowerment and enhancement of professional skills through continuous training

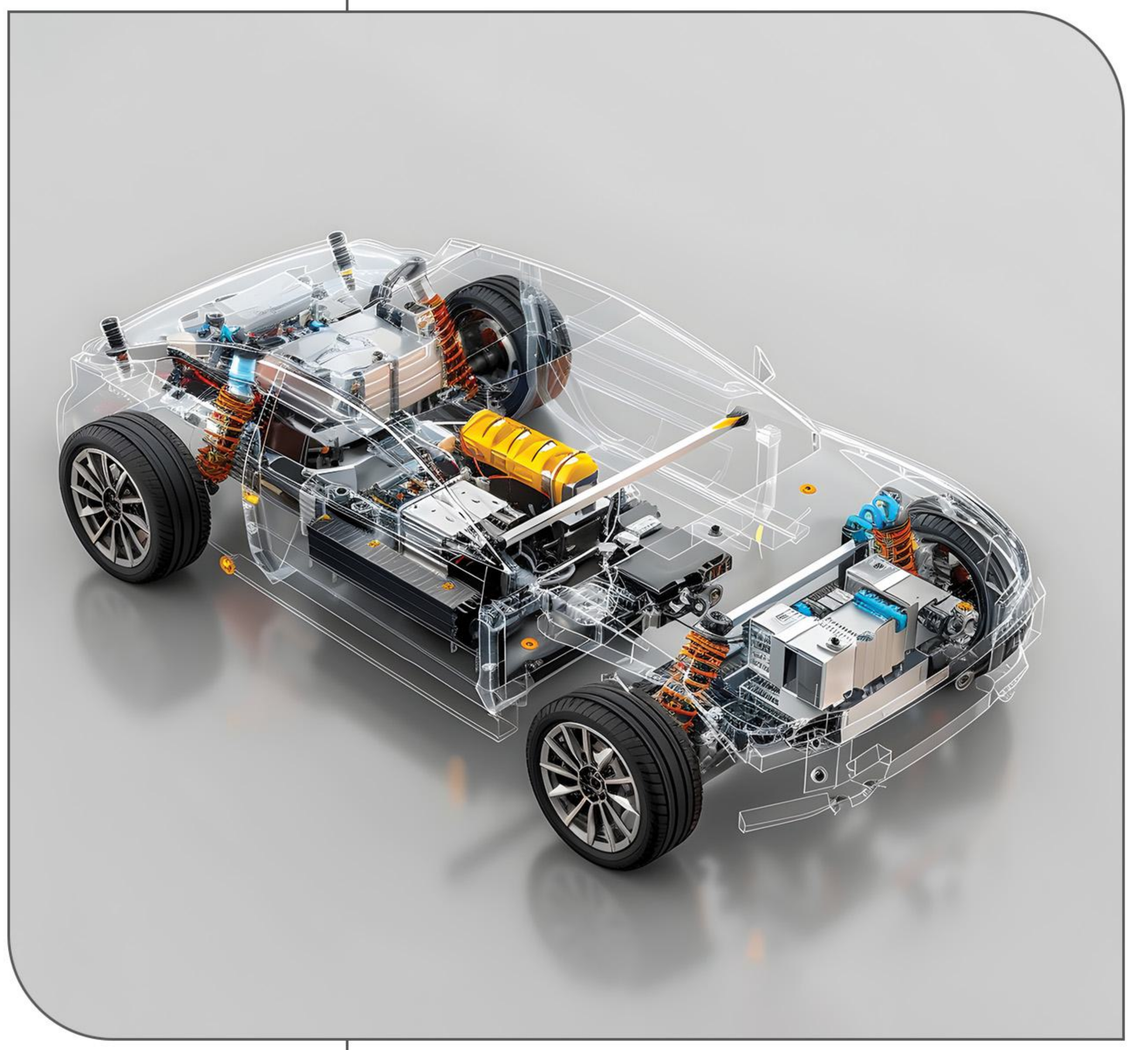

Merit-based advancement driven by creativity and innovation

Provision of safe working conditions and promotion of job satisfaction

Enhancement of social welfare and reinforcement of organizational identity

# Contribution to Industry

Investment in electric vehicle platforms to promote sustainable and green mobility

Localization of components and transfer of advanced technologies

Expansion of the Special Economic Zone dedicated to automotive manufacturing in Iran

# Private Airport of ARG-E-JADID Special Economic Zone

# Minister of Industry and Mines Mr Aliabadi's visit - july 2024

# Bam Automotive Company (BAC)

**Year of Establishment**: 2002

**Mission**:Design, manufacture, and supply safe, high-quality, and cost-effective vehicles aligned with domestic and regional market needs, with a strong focus on customer satisfaction and sustainable development. Production planning is aligned with manufacturing capacities, utilizing up-to-date technologies within budgetary constraints, emphasizing aftersales services, parts availability, fuel efficiency, environmental considerations, and employment generation in the Arg-e-Jadid Bam Special Economic Zone.

**Vision**:To become a trusted and recognized brand in the domestic and regional economy and mid-range vehicle segments through product portfolio expansion, improved production efficiency, targeted market share growth, cost optimization, quality enhancement, strategic partnerships with international automakers or suppliers, sustainable annual production capacity, and gradual product diversification.

**Business Partner**: Livan

**Factory Location**: Phase 3, Industrial Zone, Arg-e Jadid Bam Special Economic Zone, Km 10, Bam–Zahedan Road, Bam, Iran

**Head Office**: 4th Floor, Sadaf Building, Nakhle Boulevard, Kerman Khodro Boulevard, Km 16, Karaj Special Road, Tehran, Iran

**Employees**: 1,387 (Tehran and Factory)

**CEO**: Mr. Mohammadreza Shakeri Fard

**Activity**: Passenger vehicle manufacturing

**Key Achievements**: Launch of vehicle production lines including trim and body, commissioning of a state-of-the-art robotic paint shop, increased production volumes and workforce, and establishment of central and chemical warehouses.
